The JPFO Genocide Chart
© JPFO.org 2002

This is derived from the JPFO website page - as a more printer-friendly option. The complete web page is accompanied by a detailed promotion of the Death by "Gun Control" book, written by Aaron Zelman and Richard W. Stevens - and available from the [JPFO store]. It works on a level that nobody can dispute: documented world history.

Here’s the Formula: Hatred + Government + Disarmed Civilians = Genocide

What makes the argument so powerful? Two factors. First, it makes common sense: unarmed defenseless people have no hope against armed aggressors. Second, it states the historical truth: evil governments did wipe out 170,000,000 innocent non-military lives in the 20th Century alone. See the film "Innocents Betrayed" for further chilling evidence, also available from the [JPFO store].

When the gun prohibitionists quote a statistic about how many people are killed by firearms misuse, the discussion sometimes bogs down into whose crime statistics to believe and how to count crimes vs. the defensive firearm uses.

In the 20th Century:

- Governments murdered four times as many civilians as were killed in all the international and domestic wars combined.
- Governments murdered millions more people than were killed by common criminals.

How could governments kill so many people? The governments had the power - and the people, the victims, were unable to resist. The victims were unarmed.
